

Goat producer field day

Your production questions answered

Saturday 2 December 2017

VENUE "Deer Park" 1020 Old Stanthorpe Road, Warwick, follow signs past house to Blake Road

TIME 9:00am to 3:00pm

What growth rates can you expect from young rangeland goats with and without supplementation? The interim results are in from the MLA funded QLD and NSW trial sites, so come along to this event to hear from the project team and host producers about what you can expect from your animals.

What's on and why attend?

- The latest information on rangeland goat growth rates and supplementary feeding options
- What you need to know about goat nutrition
- How to tackle internal parasite control
- How your levies are being invested and training opportunities available to you
- Biosecurity – what you need to know

Join us for a BBQ lunch of lupin supplemented and grass fed goats and see if you can pick the difference!

Free webinar – 12pm 12 December

Can't make it to Warwick? Join the project team and host producers for a short webinar to hear more about the trial results and how you can apply the learnings to your enterprise. The webinar is scheduled for **Tuesday, 12 December 2017, 12pm Australia Eastern Time (Brisbane)**. To register for the webinar [click here](#) or visit the events page on the MLA website www.mla.com.au

Field day RSVPs and for more information: Shannon Plowright at (02) 6228 6200 or shannon.plowright@ausvet.com.au by **25 November** for catering purposes
